

MEET INGE WEVER

IN-HOUSE LEGAL COUNSEL, ROLA MOTOR GROUP

VICE-CHAIRPERSON, NADA Western Cape REC

MEMBER OF NADA LEGAL AND COMPLIANCE WORKING GROUP

Name: Inge Wever

Occupation: In-house Legal Counsel at Rola Motor Group; Vice-Chairperson of NADA Western Cape REC and member of the NADA Legal and Compliance Working Group

Brief Background

With a background in finance, law, risk, and compliance, I enjoy helping businesses tackle complex challenges in a practical and pragmatic way. My experience spans commercial law, governance, compliance, risk management, and dispute resolution, with a strong focus on finding workable solutions that protect the business while supporting growth and innovation.

What does a day in your role look like?

My role is so dynamic that no two days look the same. One moment I'm reviewing contracts, the next I'm helping resolve a customer issue, advising on a legal risk, or working through a compliance challenge. I spend a lot of time supporting managers and teams across the business, helping them make informed decisions while keeping risk and compliance in check.

I also work on policies, investigations, training, governance matters, and regulatory requirements. At the heart of it all, my role is about finding practical solutions, protecting the business, and helping people navigate challenges with confidence.

Challenges and rewards of the position?

One of the biggest challenges of my role is balancing legal, compliance, risk, and operational priorities while supporting multiple departments and dealing with a wide variety of issues, often under tight deadlines. Every situation requires careful consideration to protect the business while still enabling practical solutions.

The most rewarding part is knowing that my work helps the business make informed decisions, manage risk effectively, and navigate challenges with confidence. I enjoy solving complex problems, supporting people across the organisation, and contributing to a strong culture of governance, accountability, and continuous improvement.

In which areas can the industry improve?

I believe the future of our industry lies in balancing innovation with trust. While we continue to improve customer experience and digital capabilities, there is also room for greater transformation and a willingness to adapt to changing ways of working. By embracing change, investing in our people, and maintaining strong ethical and compliance standards, we can create lasting value for both customers and businesses.
